

Plotly Studio: Transform any dataset into an interactive data application in minutes with Al. **Sign up for early access now.**

Dash Enterprise App Workspaces

Workspaces contains a VS Code-like IDE, Jupyter notebooks, and an isolated "production-like" environment. In a workspace, you can author an app from creation to deployment without leaving your browser.

Using Workspaces — Getting started with Workspaces. Learn how to create and manage a workspace.

Using the IDE — Learn how to use the IDE and its features.

Tabnine AI Code Assistant — Use Tabnine AI code assistant code completions and chat to accelerate Dash app development.

Development App — Running and previewing your app in Workspaces.

Services with Workspaces — Redis and Postgres services in Workspaces.

Schema Browser in Workspaces — How to use the schema browser in App Workspaces to explore and preview data sources.

Cloning Repositories into a Workspace — Learn how to clone a 3rd party repository into a Workspace.

Python Package Management — Keep Python packages in your development Workspace in sync with your deployed application.

Apt Package Management — How to install apt packages in your workspace.

 $\label{lem:polymer} \textbf{Deploying Changes} - \text{Deploying your app from Workspaces}.$

Limitations & Warnings — Workspaces warnings & limitations.

Troubleshooting Using Workspaces — Using Workspaces to troubleshoot build failures.

Changelog — Workspaces changelog.
