Project Maintenance

This page outlines how different projects in the **Plotly Organization on GitHub** are maintained. There are two types of projects: those that are **maintained by Plotly**, and those that are **maintained by the Plotly community**.

Maintained by Plotly

Maintained by Plotly means that Plotly staff will review issues, merge pull requests, and prepare releases as part of their regular work.

Projects that are maintained by Plotly include the following badge on the `README.md` in that project's GitHub repository.

Maintained by ili plotly

Some of the projects you'll find this on are **Dash**, **Plotly.py**, and **Dash AG Grid**.

Become a Contributor

For details on how to contribute to a Plotly-maintained project, see the `README.md` and/or `CONTRIBUTING.md` files in the project's GitHub repository. For example, the instructions for contributing to Dash are in `CONTRIBUTING.md`.

Maintained by the Plotly Community

Maintained by the Plotly Community means that while we host the repository, we rely on community members to manage the project's development.

Projects that are maintained by the community include the following badge on the `README.md` in that project's GitHub repository.

Maintained with ❤️
by the **Plotly Community**

Some of the projects you'll find this on are **Dash Slicer**, **Dash.jl**, and **angular-plotly.js**.

Become a Contributor

For details on how to contribute to a community-maintained project, see the `README.md` and/or `CONTRIBUTING.md` files in the project's GitHub repository. The `README.md` should also contain details about who the project's current maintainers are.

Become a Maintainer

If there is a project that you'd like to work on, but it has no maintainers, you can reach out to us at **community@plot.ly** to become a maintainer.
